

Sustainability REPORT 2025

CARBON EMISSIONS

Andreas Hettich GmbH has reduced its SCOPE 1 + 2 CO₂ emissions by 2024 more than half compared to 2018.

1,24 Mio.
kg CO₂

2018

0,53 Mio.
kg CO₂

2024

57% Reduction

98%

COMPANY CARS SWITCHED TO ELECTRIC VEHICLES

100%

PURCHASED GREEN ELECTRICITY

Organizational measures for energy saving, enabled by modern building management technology and monitored via a measuring station system.

Several million euros in investment made this extraordinary success possible:

**Modernization of
air conditioning
and ventilation
systems**

**Conversion to
LED lighting**

**Use of waste heat
in an adsorption
refrigeration
system**

**Growing share of
self-generated
electricity by
photovoltaic**

**Combined
heat and
power plant**

**Reduced heat
demand via building
envelope upgrades**
